

## Recent Developments in Elite Research Laboratories Around the World

The Institute for Research in Immunology and Cancer (IRIC) presents the thirty-fifth edition of its Distinguished Scientist Lecture Series, with a full thirteen part program. Join us on Mondays at 11:30 am, to learn about the latest findings in cancer research with leading biomedical investigators from Canada, USA, Europe and Asia.

### **Ian Watson**

McGill University  
Montreal, QC, Canada  
*Research in Melanoma: a Blueprint  
Towards Curative Treatment Strategies  
for Cancer*

**January 30**

### **Mickey Kosloff**

University of Haifa  
Haifa, Israel  
*Deciphering Structural Design Principles  
for Interaction Specificity in G Protein  
Signaling*

**April 17**

### **Jason Stumpff**

University of Vermont  
Burlington, VT, USA  
*Powering On and Off the Forces that Move  
Mitotic Chromosomes*

**February 6**

### **Anne-Marie Mes-Masson**

Centre de recherche CHUM  
Institut du cancer de Montréal  
Université de Montréal  
Montreal, QC, Canada  
*Precision Therapeutics in Ovarian Cancer*

**April 24**

### **Sidong Huang**

McGill University  
Montreal, QC, Canada  
*Exploiting Genetic Vulnerabilities in SW/  
SNF-deficient Cancers*

**February 13**

### **David J. Reiner**

Institute of Biosciences and Technology  
Texas A&M University  
Houston, TX, USA  
*C. elegans VPCs as a Model for Ras  
Effector Switching*

**May 1**

### **Yale Michaels**

Michael Smith Health Research BC  
Vancouver, BC, Canada  
*Understanding and Controlling T Cell  
Development from Pluripotent Stem Cells*

**February 20**

### **Ryan Kelly**

Brigham Young University  
Provo, UT, USA  
*Recent Developments in Single-cell and  
Spatial Proteomics*

**May 8**

### **Caroline Robert**

Gustave Roussy  
Université Paris-Saclay  
Villejuif, France  
*Immunotherapy and Targeted Therapies of  
Melanoma*

**February 27**

### **Peter J. McCormick**

William Harvey Research Institute  
Queen Mary University of London  
London, UK  
*G-protein Coupled Receptors: not a Solo  
Act*

**March 6**

### **Brian Arey**

Bristol-Myers Squibb Co.  
Lawrenceville, NJ, USA  
*A Rational Approach to Identification of  
Novel Drug Discovery Targets Modulating  
Flow-induced Endothelial Function*

**March 13**

### **Pier Paolo D'Avino**

University of Cambridge  
Cambridge, UK  
*Mechanisms Controlling Cell Division and  
their De-regulation in Cancer Cells*

**March 27**

### **Francesca Di Cara**

Dalhousie University  
Halifax, NS, Canada  
*Peroxisome: The up-and-coming Organelle  
in Immunometabolism*

**April 3**

#### **Schedule**

Lectures are held from 11:30 am to 12:30 pm on Mondays, except when otherwise indicated.

#### **Venue**

Lecture Hall **S1-111**  
Jean-Coutu Pavilion  
2950, chemin de Polytechnique  
Université de Montréal Campus

#### **Target Audiences**

Graduate students, postdoctoral trainees and members of the greater biomedical research community.

Lectures are given in English. Free entrance.

#### **Organization**

This lecture series is organized by IRIC as part of the Université de Montréal, Faculty of Medicine, Molecular Biology Program courses BIM-7021: Conférences en biologie du cancer.
